Hello Ming,

This is actually one of the most legitimate requests for a repairs that we have. It's bad, very bad, and in need of being fixed much sooner than later. It's going to mean a bit of inconvenience for motorist when the work is done but that pales when compared to the safety hazard these bumps create.

The Westchester Streetscape Improvement Association has already removed the trees which caused the bumps in the thoroughfare, and has placed a new sidewalk at the location. Grinding out those dangerous bumps will complete this effort.

Can you have the site inspected, with the follow-up course of action moved on in as expeditiously a manner as possible? This MUST be embraced as a high priority.

Thanks

Mark

There are 3-4 places on SB Sepulveda between Howard Hughes Pkwy and Sepulveda Private 90045 where tree roots are raising the roadway in the right most lanes of Sepulveda. This has been progressing for sometime and is now verging on being a real problem for a major artery to LAX. It is a safety issue and will become a property damage issue.

Thank you for your attention to the matter.

**Reply-To:** EDMUND JURKIEWICZ <[edpaulinej@sbcglobal.net](mailto:edpaulinej@sbcglobal.net)>

On Sepulveda south going lanes near Howard Hughes overpass, there are 3-4 six inch bumps caused by side walk trees.

This needs very urgent repair. I have reported this on several occasion, no action taken.

Please forward this message to the repaire depo to rgently fix this!
